**Mid Valley Pipeline Oil Spill, Mooringsport, LA** EPA is responding to an estimated 4000 barrel crude oil spill from a 20" pipeline. The spill has impacted 4 miles of a creek and bayou. Nearly 2700 barrels of oil have been recovered thus far. The oil is currently contained 300 yards up gradient of Caddo Lake. EPA has established unified command and is working with the RP and state and local responders to clean up the oil and prevent it from impacting Caddo Lake. **(Crossland x2721)**

**Oil Spill Outreach, Addison, TX** EPA is hosting its annual SPCC/FRP workshop on October 28. Approximately 150 attendees have preregistered. The workshop is an opportunity for EPA to provide guidance on EPA's oil spill prevention rules. The USCG will also be presenting a portion of the workshop. **(Crossland x2721)**
